MASTER'S DEGREE in Computer Science

SUMMARY

Passionate technologist with experience in web development and system security, seeking a specialized Master's degree in Computer Science to broaden my technical and soft skills, and deepen my passion for advanced technologies.

EDUCATION

University: Les Cours Sonou, Cotonou, Benin   2015 – 2018
Bachelor's Degree in Computer Science
Main subjects: Programming, OOP, Algorithm, Operating Systems, Networks and Security, Web Development

Collège Catholique Père Aupiais , Cotonou , Bénin   2018
High School Diploma in Science

Certifications

- Google Cybersecurity Certification (In progress)
- Cybersecurity Certification from ANSSI (March 2024)
- Certificate of Proficiency in English and Business Communication (June 2018)

PROFESSIONAL EXPERIENCE

Web Project Manager Intern   Style ET INTERIEUR, Paris, France (January - March 2024)

- Led the design of the Style et Intérieur website, selecting Symfony for optimal responsiveness and aesthetics
- Coordinated the work of a 5-developer team, facilitating weekly meetings to track progress and resolve technical blockers
- Implemented agile methodologies for project tracking, using Trello
- Contributed to the development of technical solutions for website improvement

Web Developer Intern   Good Feeling Communication, Paris, France (May - June 2023)

- Developed and deployed web pages for Youmoq using HTML, CSS, JS, and Laravel
- Implemented email marketing campaigns with Brevo, increasing customer engagement
- Conducted a code source audit, ensuring compliance with development and security standards

IT Professional Intern   IT Service DSI, Ministry of Education, Benin (May - September 2022)

- Contributed to the optimization of the computer network, ensuring secure connectivity
- Installed and configured workstations and servers, respecting the security practices of computer systems
- Collaborated in the development and implementation of IT projects
- Gained valuable experience in network security management
-

PERSONAL PROJECTS

- Personal Portfolio: Showcase of my development skills.
  Technologies: HTML, CSS, JavaScript.
- Recruitment Website: Facilitates the connection between employers and candidates.
  Technologies: PHP, Symfony, MySQL.
- Mobile Attendance Tracking Application: Facilitates attendance tracking and administrative management for a school.
  Technologies: Flutter, Spring, API REST.
- Fashion House Management: Application for managing appointments and inventories.
  Technologies: Java, Android SDK
- Vulnerability Analysis: Security audit of a fictitious website to identify and correct security flaws.
  Tools: OWASP ZAP

SKILLS

Technical Skills

- Programming Languages: HTML, CSS, JavaScript, Python, Dart, Java, PHP
- Frameworks: Laravel, Symfony, Spring Boot, React
- Databases: SQL/MySQL
- Cybersecurity: Vulnerability analysis
- Tools and Technologies: VS Code, Eclipse, Netbeans, Canva, Figma, Git (Github, GitLab), Trello, Jira

Soft Skills

- Clear and effective communication
- Adaptability and ability to work on diverse topics/environments
- Teamwork and autonomous work
- Problem solving and time management
- Critical thinking

INTERESTS

- Technology and ICT: Active technological watch
- Reading (science fiction and fantasy novels)
- Japanese culture and language
- Volunteering (Association Cardiorezurexion)

LANGUAGE

- French (native)
- English (intermediate)
- Fongbé (native)
